WHAT WILL MY CHILD LEARN AT SCHOOL?

The new syllabuses build on the strength of the existing NSW curriculum. Many features of the new K–10 English, Mathematics, Science (Incorporating Science and Technology K–6) and History syllabuses are retained. Literacy and numeracy remain important areas of focus in K–6, where essential foundation skills are developed.

The syllabuses identify the knowledge, understanding, skills, values and attitudes that students are expected to develop in each learning area. They are designed to provide flexibility for teachers to develop their teaching and learning programs to meet the needs of their students.

K–6

English

- Students develop their language skills through activities involving speaking and listening, reading and writing, and viewing and representing.
- They learn about language and literature through working with a wide range of print, spoken, visual, media, multimedia and digital texts.
- They interpret and express their views on what they hear, see and read.
- They create written and digital texts, and deliver formal and informal presentations.
- For the first time, there will be a requirement that students experience a range of texts including Australian works, multiculturalism, Aboriginality and Australian identity, and Asian perspectives.
- There is an increased emphasis on grammar and the teaching of quality literature.

Mathematics

- Students develop their mathematical knowledge, skills and understanding through a range of learning experiences across:
  - number and algebra, eg whole numbers and fractions and decimals
  - measurement and geometry, eg length, area and time
  - statistics and probability, eg data and chance.
- They develop their problem-solving skills, and mathematical reasoning and communication.
- Students in Stage 3 develop a deeper understanding in statistics and probability.

Science and Technology

- Students develop their skills in using processes of Working Scientifically and Working Technologically to answer interesting questions and develop creative solutions to important 21st century problems.
- They develop their curiosity and understanding about the Natural Environment and the Made Environment through learning about the Physical World, Earth and Space, the Living World, the Material World, Built Environments, Information and Products.
- Students learn about the influence and relevance of science and technology in their lives now and in the future.

History

- Students investigate their personal, family and community history.
- They develop understanding of Australia’s Indigenous and colonial history and how Australia became a nation.
- Students learn about:
  - historical concepts such as viewing an historical event from a different point of view
  - historical skills, such as using historical sources for an investigation.
